Technical Architect with over 8 years of experience in designing and implementing scalable enterprise solutions. Expert in cloud architecture, enterprise IT governance, systems integration, modernisation and cloud migration. Proving ability to lead and mentor technical teams to deliver robust, scalable and secure solutions. Skilled at leveraging cutting-edge technologies to drive digital transformation, modernisation and business performance. **I am SC Cleared.**

EXPERIENCE

TECHNICAL ARCHITECT, ACCENTURE UK

2023 – TILL DATE

Serving as Lead Technical Architect for government modernization projects aimed at redesigning business processes, improving integration, and enhancing accessibility. These initiatives focus on driving improved revenue collection, compliance, and operational efficiency. Collaborated closely with stakeholders to deliver robust, scalable, and secure solutions while mentoring technical teams to achieve project goals.

Key responsibilities:

- Translated functional and non-functional requirements into detailed technical designs, including As-Is, target infrastructure, high-level designs, low-level designs and application architectures.
- Developed high level solutions architecture and technical designs, including application architecture, security architecture, application integration, infrastructure architecture and DevOps architecture using architecture design principles that aligned with client business objectives.
- Collaborated closely with clients' technical and business stakeholders to understand requirements, conduct due diligence, and formulate to-be solution designs aligned with business objectives.
- Architected and created scalable API-based integration solutions, to streamline communication between disparate systems, enhancing data consistency and reliability.
- Collaborated with DevOps team in integrating DevOps practices into architecture design, improving CI/CD pipelines, enhancing system reliability, security measures and reducing deployment times.
- Provided strategic recommendations for reusable solution designs tailored to different integration patterns including API, real-time, event, and batch processes, maximising scalability, and performance.
- Championed the adoption of best practices, standards, and processes to streamline development and deployment cycles.

CLOUD ARCHITECT CONSULTANT, SYNOPTIK

2019 – 2023

My role at Synoptik involved helping clients to unlock significant business value through cloud migration, transformation, and modernisation of their technology landscapes. Guided

organisations in retiring technical debt, accelerating innovation, and navigating the complexities of cloud transformation to achieve operational excellence and cost efficiencies.

Key responsibilities:

- Delivered transformative cloud solutions to help clients modernise technology landscapes, eliminated outdated systems, and accelerate innovation. Guided clients through the complexities of cloud migrations, ensuring smooth transitions for critical business workloads.
- Led the discovery, design, and execution of a large-scale enterprise cloud migration, transitioning workloads from two data centres to AWS. This initiative enhanced workload reliability, achieved high availability, and reduced hosting and application support costs.
- Partnered with stakeholders to develop data-driven technology strategies and roadmaps aligned with long-term business goals, improving operational efficiency and scalability.
- Designed and implemented reusable components such as auditing, logging, monitoring, and dashboards, ensuring consistency and efficiency across projects.
- Advised project teams on architectural best practices based on the TOGAF framework, accelerating project delivery timelines and ensuring compliance with industry standards.
- Conducted cost optimisation initiatives, achieving a 15% reduction in cloud infrastructure expenses.
- Integrated DevOps practices into architectural designs, optimising CI/CD pipelines, improving system reliability, and reducing deployment timelines.

**LECTURER IN COMPUTER SCIENCE (ONLINE MSC), UNIVERSITY OF YORK, UK
2020 – TILL DATE**

- Provided high quality research, learning, teaching and curriculum development in the Computer Science Online MSc postgraduate students.
- Taught courses include: Algorithms and data structures, Big data analytics and machine learning, Applied AI, Computer networks and security.
- Research interest includes machine learning, artificial intelligence and cyber security.

IT SYSTEMS ADMINISTRATOR, EXTERRAN

2009 – 2011

- Orchestrated and executed scheduled maintenance activities, ensuring minimal disruption by coordinating with key stakeholders.
- Supervised, trained, and mentored junior staff in system and network administration, fostering a collaborative and skilled team.
- Demonstrated expertise in datacentre technologies, including LAN/WAN networks, NAS/SAN storage, Oracle, Linux, Microsoft Server, firewalls, VPNs, and network protocols (TCP/IP, DNS, DHCP, etc.).
- Managed user accounts, access privileges, file sharing, and system/network security to uphold a robust IT environment.
- Delivered critical support for servers, network hardware, data storage systems, virtual desktops, and other network-connected hardware/software.
- Contributed to infrastructure maintenance, administration, and strategic planning for internal-facing systems.

TECHNICAL SKILLS

- Proficient in application and infrastructure architecture designs using architecture design principles.
- Expert in cloud architecture, enterprise IT governance, systems integration, modernisation and cloud migration.
- Extensive experience with AWS and Azure Cloud platforms
- Expertise in designing and implementing scalable innovative solutions in the cloud.
- Skilled in developing and implementing IT governance policies, technical service assurance and procedures
- Experienced in leading technical and project teams to success.
- Proficient in Microservices architecture, Kubernetes, AWS ECS, EKS, Ansible, Terraform, CloudFormation, Python & Bash scripting, Jenkins, Docker, Git, OpenAPI, Swagger, YAML, JSON, REST, SOAP, XML, Agile methodology, Jira, Confluence, Visio and Lucidchart.

CERTIFICATIONS

- AWS Certified Advanced Networking – Specialty, 2024
- AWS Certified DevOps Engineer – Professional, 2024
- AWS Certified Data Analytics – Specialty, 2022
- AWS Certified Machine Learning – Specialty, 2022
- AWS Certified Solutions Architect – Professional, 2021
- AWS Certified Security Specialty, 2019
- Deep Learning Specialization, Coursera, 2018
- Cisco Certified Network Professional – CCNP, 2010
- Cisco Certified Network Associate – CCNA, 2008

EDUCATION

- | | |
|---|-------------|
| • PhD in Engineering, Robert Gordon University, UK | 2013 - 2018 |
| • MSc Systems Engineering, University of Manchester, UK | 2011 - 2012 |
